82%

ACADEMIC PROJECTS

Employee Management System

HTMLCSSJS

› Built a dynamic employee management interface supporting add/filter by salary and aggregate metric calculation.

› Leveraged JavaScript array methods and DOM manipulation to process input and render real-time dashboard updates.

E-commerce Product Showcase

HTMLCSSJS

› Designed an interactive product display page with individual product cards, pricing details, and status tags.

› Built a clean navigation bar with structured layout and styled action buttons to improve overall UX.

Responsive Website Layout

HTMLCSSBootstrap

› Developed a fully responsive layout featuring a navigation bar, multi-column grid, and structured footer.

› Used Bootstrap's grid system to ensure seamless cross-device compatibility.
